FR PHASE 2 MIDWEIGHT NECK GAITER

FEATURES

Our FR Phase 2 Neck Gaiter is constructed using our patented midweight FR blend of Modacrylic and FR Rayon. Our FR is inherent and built-in at the yarn level, meaning it won't wash out and provide no melt/no drip protection for the life of the garment. Acclimate[®] Dry moisture management and Ag47[®] anti-microbial/anti-odor will keep your face protected, comfortable and odor-free. Utilizing Clean Seam[®] flat-seaming to provide a comfortable contoured next-to-skin fit that fits close to the face and neck but does not constrict.
