HEARTSTART ONSITE DEFIBRILLATOR
THE FIRST DEFIBRILLATOR AVAILABLE WITHOUT A PRESCRIPTION TO COMMERCIAL USERS

SELF-TEST ENSURES READINESS:
- Daily self-tests check electrical components, subsystem, pads and battery
- Self-test also verifies that the pads cartridge is installed and in working order
- Blinking green “Ready” light means the OnSite has passed its last self-test, so you can be confident the defibrillator is ready for use

LONG BATTERY LIFE:
- 5-year shelf life plus 4-year installed life
- Same battery technology used with confidence in millions of cameras

EASY-TO-USE:
- Using the HeartStart Defibrillator is simple. Pulling the green handle activates the defibrillator and voice instructions. These instructions are paced to your actions, to help guide you through the entire process from placing each pad on the patient to delivering a defibrillation shock.

VISUAL PROMPTS GIVEN DURING CPR:
- Not pushing hard/deep enough? Prompts will tell you to push harder.
- Pushing hard enough? It will say, “Good compressions.”
- Not pushing fast enough? A metronome will lead you to the right rate. It will even show you the depth of each compression. In real time.
- Not yet started? The AED Plus® will tell you to get started.
- Compressions stopped? It will tell you to continue.
