As an industry, we have been trained to think that you have to sacrifice thermal protective performance (TPP) in order to achieve maximum total heat loss (THL). Introducing a game changer for the fire industry, TECGEN®. Fire-Dex FXR turnouts are specifically designed to minimize firefighter stress and fatigue through Active Posture Design™, allowing for full range of motion - especially while wearing your SCBA!

**FIRE-DEX EXCLUSIVE TECGEN® OUTER SHELL**

THE BEST TPP/THL BALANCE IN THE HISTORY OF TURNOUT GEAR

REVOLUTIONARY NEW TECGEN71 MATERIAL
LIGHTWEIGHT AND FLEXIBLE

A structural firefighting outer shell designed to lessen heat stress by reducing weight and increasing flexibility. TECGEN71 features a ripstop twill weave that combines the proven durability of DuPont™ Kevlar®/Nomex® and the unique benefits of the TECGEN fiber. TECGEN71 is the first of its kind to address this growing health concern with innovative technology aimed at providing the perfect balance of breathability, comfort, TPP and THL, all while offering an overall reduction in composite weight.

**SEAMLESS COLLAR**
Comfort and NFPA compliant protection without the need for a throat tab

**OMNIDEX™ SHOULDER**
Eliminates coat rise and sleeve retraction by moving the shoulder seam to the natural bending point, allowing for optimal SCBA positioning

**ATHLETIC PANT DESIGN**
Provides natural movement and comfort in a forward firefighting position

**DEXFLEX™ KNEES AND ELBOWS**
Move freely and reduce resistance with naturally-bent knees and elbows

Full range of motion and increased flexibility and durability

Minimizes wear and tear from cuff dragging
STACK UP THE SAVINGS WITH OUR DARLEY ARMOR AP™ GEAR PACKAGE

STEP UP YOUR GAME WITH THE BEST DUPONT NOMEX®/KEVLAR® OUTER SHELL BLEND

For at least two decades, fire departments choosing outer shells made of 40% DuPont™ Nomex®/60% DuPont™ Kevlar® have been limited to stiff and uncomfortable gear...until now. Utilizing the groundbreaking Filament Twill Technology™ used in PBI Max™, the new Armor AP™ fills the needs of firefighters who prefer improved mobility, durability, and improved protection at an economical price. Armor AP™ - a 6.5 oz. outer shell with absolute performance.

ABSOLUTE PERFORMANCE

How does one achieve absolute performance utilizing the same fibers (meta-aramid, para-aramid) used Fusion™ and TenCate Advance™...and not increase the cost 25-50%? The answer lies in Filament Twill Technology™. Like PBI Max™, Armor AP™ is powered by DuPont™ Kevlar® filament in a twill weave. The result is a lighter weight outer shell (6.5 oz.) with improved comfort/flexibility, improved strength and durability, and equal to improved protection.

IMPROVED DURABILITY

DuPont™ Kevlar® filament allows Armor AP™ to resist tearing for a longer period of time than traditional outer shells like Fusion™ and TenCate Advance™...improving durability.

IMPROVED COMFORT/FLEXIBILITY

Better comfort and flexibility lead to better mobility. Better mobility can make all the difference in a life threatening situation. Firefighters wearing Fusion and TenCate Advance don’t need to sacrifice mobility any longer...Armor AP is the answer.

The H41 Interceptor™ Hood is made with a layer of DuPont™ Nomex® Nano Flex inside that acts as a filter to reduce firefighters’ exposure to persistent fireground carcinogens and other contaminants. We’ve used this revolutionary material sewn between two layers of knit 6.0 oz. PBI®/Lenzing (20%/80%) to provide the maximum performance for particle barrier filtration, comfort, and thermal and flashover protection.

**SCIENTIFIC DATA**
The H41 Interceptor™ blocks 95% of particulates at .2 micron in size or larger. For perspective, there are 25,4000 microns in one inch and a human hair is about 75-100 microns wide, so a .2 micron particulate is about 500x smaller than a strand of hair. Testing has shown that the particulates sized at less than .2 microns don’t have enough mass to make it through the double layer knit and the Nomex® Nano Flex; essentially meaning that this hood blocks 100% of particulates less than .2 microns.

**PROTECTION, COMFORT AND DURABILITY AT AN AFFORDABLE PRICE**

**H41 INTERCEPTOR™ HOOD WITH STEDAIR® PREVENT**
Choose the H41 Interceptor™ to reduce the absorption of carcinogens in the highly-permeable skin around your face and neck.

This 2-layer hood features an inner layer of Stedair® PREVENT with one outer layer of 8oz. Nomex® 100%.

- Unmatched breathability compared to moisture barrier technology
- Maintains excellent flame and heat resistance
- Exceeds NFPA 1971 requirements for TPP, THL and burst strength
- Built for durability
- Mask not included

**BN698 INNOTEX GRAY™ Particulate Blocking Hood 25**

- Blocks more potentially harmful particulates* than any other hood (99.9%)
- Maintains its 99.9% particulate-blocking performance after 100 wash cycles, exceeds thermal protection requirements
- Comfortable, natural feel
- Inspection opening enables visual inspection of the integrity of barrier layer, and has proven its system level reliability and durability with human FAST** testing on both new hoods and hoods washed 100 times
- Certified to the NFPA 1971 Standard
