

Invest in Your People. Invest in Your Gear. Protect the Protectors.

DECON ZONE

Sanitize. Deodorize.

DECON ZONE is Great for:

- Armor
- Blankets
- Combative gear like HIGH GEAR, RedMan, etc.
- Sleeping bags
- Kevlar vests
- Medical equipment, stethoscopes, lab coats, knee braces, elbow braces, portable stretchers, back boards, etc.
- Mess kits
- Military, law enforcement and first responder equipment
- Riot gear
- Shoes
- Sports gear, boxing, MMA
- Training gear
- Water containers

Change Your Definition of *Clean*:

- **Effective Cleaning** – System removes viruses, bacteria, mold & other biological pollutants
- **Reduces Illnesses and Incidences of Infections** – Includes Staphylococcus aureus & Methicillin-resistant Staphylococcus aureus (MRSA) – tested on STAPH, MRSA, and Candida bacteria with over a 99.9% kill rate
- **Safe** – Unique Smart Technology tracks temperature, humidity levels and controls ozone at or below regulatory limits
- **Fast, Easy-to-Use** – Push-button start and 24 minute cycle, means less downtime for equipment
- **Green Technology** – Uses ozone for a chemical-free clean, with no need for bleach, iodine or hydrogen peroxide
- **Durable** – Stainless steel machine with five-year warranty components and 10-year stainless steel

"The Decon Zone Sanitizing System... isn't just... for armor... Personnel are more comfortable wearing armor and other equipment when it doesn't smell, not to mention that there is less risk to their health. So to sum all of the pluses up: green technology, developed by a veteran, keeps troops healthy, improves morale. Not bad." — Eric Graves, Soldier Systems
