

CORPORATE PROFILE

MISSION STATEMENT: TO PASSIONATELY SERVE THE WORLD'S FIRST RESPONDER AND TACTICAL COMMUNITIES BY PROVIDING HIGH QUALITY, SAFE, AND INNOVATIVE PRODUCTS WITH UNMATCHED COMMITMENT AND SERVICE.

WHO WE ARE

Since 1908, W.S. Darley & Co. has been dedicated to serving the world's Fire and Emergency Services and Defense organizations. Darley remains a family owned and operated business. Corporate headquarters are located at 325 Spring Lake Drive in Itasca, Illinois. Manufacturing and engineering operations are in Chippewa Falls, Wisconsin, and Janesville, Iowa.

Our entire company is committed to customer satisfaction. We are dedicated to excellence and offer a diverse line of quality products and services through progressive design, manufacturing and worldwide distribution. Darley's involvement in the fire industry spans over a century and four generations of Darley family members.

We not only have a rock solid reputation for building quality products, but also for building strong relationships within the Fire Fighting and Military communities around the world. Darley draws strength from being a financially stable company with a unique industry position. Darley builds fire trucks, manufactures fire pumps and sells fire fighting, emergency and special operational equipment through our trained team of sales professionals. Product information can be accessed either online or through our highly regarded Darley catalogs. Nowhere else will you find a company as dedicated to the fire and defense industry. All this experience comes from a company that truly cares – W.S. Darley & Co. is customer driven.

FIRE EQUIPMENT

Generations of firefighters have relied on the Darley catalog as the ultimate source in product selection. Whether you're in the market for high tech turnout gear, the brightest LED lights, uncompromising high angle rescue hardware or a simple Halligan bar, Darley carries it. Every edition includes an extensive list of new, must-have items for the fire, rescue and EMS professionals. Many customers also love the convenience of researching and ordering online at www.edarley.com.

VISION STATEMENT

TO BE A GLOBAL, FAMILY-OWNED AND PROFESSIONALLY MANAGED COMPANY WITH A LONG TERM PERSPECTIVE FOR OUR STAKEHOLDERS AS THE FIRST CHOICE OF FIRE, EMERGENCY AND TACTICAL PROFESSIONALS WORLDWIDE.

DEFENSE EQUIPMENT

Darley has enjoyed a long, proud tradition of supplying mission critical equipment to our troops. In 2007, we were awarded the first of two major DLA contracts under the Tailored Logistics Support Program (TLSP) for both Fire and Emergency Services Equipment (F&ESE) and Special Operational Equipment (SOE). The DoD recognized Darley's corporate experience, past performance and ability to be a reliable vendor. Equipment can be ordered through TLS, GSA, DoD FEDMALL, or open market.

Darley's Defense Division gives maximum attention to this growing market. Our outside defense sales team is comprised exclusively of veterans who proudly served our country. They are currently working with major military bases throughout the country. Visit www.darleydefense.com for view our Capabilities.

PUMPS

Whatever your fire fighting needs, Darley has the right pump to do the job. We offer portables, floating, high-lift booster, CAFS, PTO, engine driven, front mount, and midship pumps with flows from 60 to 3500 GPM and pressures up to 1200 PSI. In addition, all Darley midship pumps are UL ratable and meet NFPA requirements. From the smallest skid-mount to the chassis mounted midships, every Darley pump is designed for fast, efficient and safe operation.

AUTOCAFS®

Compressed Air Foam Systems (CAFS), provide superior firefighting capabilities offering quicker knockdown and improved personnel and structural protection. Darley's AutoCAFS® are the choice of informed firefighting professionals across the country. Engineered for simplicity and performance, these systems are known for their reliability and high quality.

ODIN® FOAM DIVISION

Based in Janesville, Iowa, ODIN® Foam Division is the world's leader in Compressed Air Foam Systems (CAFS) research and development and produces the safest and most reliable CAFS of any manufacturer today. With nearly 20 years of production experience, ODIN® is one of the oldest and most experienced manufacturers of CAFS and holds three separate patents for its innovative designs. ODIN® has fought fires under contract with various organizations. Products range from a 70 GPM / 50 CFM CAFS unit, all the way up to a cannon-size CAFS module that delivers 1000 GPM / 400 CFM. We also design and build engine, hydraulic, and split-shaft PTO driven systems. Customers can find detailed product information on www.odinfoam.com.

OHLER PUMP DIVISION

The Ohler Pump Division is also located in Janesville, Iowa, and was established in 1947 by Ralph G. Ohler. Marketed under the brand Ohler Pumps, this innovative company manufactures dependable, rugged and powerful centrifugal pumps, ranging from 1" to 6". Ohler has produced thousands of pumps for the U.S. Military and U.S. Coast Guard, as well as many other industries. They have recently manufactured over 1,500 refueling and potable water transfer pumps to the United States Marine Corps (USMC). Visit Ohler online at www.ohlerpumps.com.

APPARATUS

Darley offers a full range of apparatus, including mini-pumpers, tankers, commercial and custom pumpers. We are known for building specialized apparatus that often includes compressed air foam systems and co-polymer bodies. These features are evident in Darley's premier program series apparatus, which is called "The Firetruck". You can expect an unmatched level of quality and service from our entire line of vehicles.

FIREBOY® - XINTEX®

In June of 2017, Darley purchased Fireboy, Xintex and Aetna Engineering, headquartered in Grand Rapids, MI. The company also has manufacturing operations in Poole, England. The new company is Fireboy-Xintex, LLC. Founded in 1973, Fireboy is the market leader in marine pre-engineered and custom engineered fire safety and suppression equipment. Xintex is a leader in gas and fire detection equipment. Aetna engineering specializes in digital instruments like tachometers. The electronics engineering and manufacturing capabilities will enhance Darley's position in the fire service.

With over one million systems in service and roughly 75% of the recreational marine market, Fireboy suppression systems are well known in the marine markets. Fireboy-Xintex also serves defense, commercial, industrial, truck, bus, rail and other markets. Please visit www.fireboy-xintex.com for more information.

POLYBILT®

In 2001, Darley partnered with ProPoly Inc. to start a new Company, Polybilt LLC. Polybilt® has been manufacturing the latest state-of-the art truck products and bodies for the fire truck market. Polyprene™ provides for years of trouble-free service life and will not rust or corrode. Also, unlike other materials such as aluminum and steel, our material will not ding, dent or crack. More information on the benefits of our products is available on www.polybilt.com.

WATER PURIFICATION SYSTEMS

In 2007, Darley received a Homeland Security Market Development Grant from the State of Illinois to develop a line of water purification systems. Darley has developed a complete line of quickly-deployable water purification systems that can be used by first responders and military professionals to aid in establishing and maintaining a potable water supply in the event of an emergency situation. The systems are available as portable self-contained units, standalone solar-powered units and fire apparatus integrated systems. The municipal purification systems are designed to work with the pump on a fire apparatus, or in conjunction with an in-place water department. Detailed information can be found on www.darley.com.

CUSTOM PUMP SOLUTIONS

Darley offers a full line of packaged fire pump systems to accommodate a wide array of fire suppression demands. The product line includes skid-mounted self-testing hydrant booster systems, NFPA 13R skid systems, engine and electric combined skids and general boosting skids. Darley's NFPA 13D offering can meet any budget constraints and provides the most advanced technology with a patented Self-Testing System (STS). Darley has sold hundreds of Tank and Pump Systems (TPS). Learn more online at www.darley.com.

SERVICE AND SUPPORT

Darley manufacturing facilities are state-of-the-art. We have the engineering skills and equipment to design, manufacture and assemble a wide variety of fire and emergency products.

Our engineering staff includes certified and professional engineers. We keep up-to-date by using the latest and most advanced computer-aided software to design everything from simple to sophisticated products. We employ the latest CNC machinery and technology to produce high quality components. Darley's work force, from machinists to engineers, undergoes continual training to maintain our reputation for innovation and excellence.

Our dealer and service network consists of over 200 U.S. distributors, with a presence in all 50 states. Darley has more than 50 International dealers in 40+ countries. Our products are actively used in more than 95 countries around the globe. Parts and service are available directly from our manufacturing plants, easily accessible through toll-free numbers or e-mail. Our goal is to ship replacement parts within 24 hours of receipt of an order.

EXTENSIVE EXPERIENCE

W.S. Darley & Co. has been supplying apparatus, pumps and firefighting equipment to the United States Federal Government as well as other governments and agencies around the world for over 60 years. During World War II, we received the Army/Navy E Award for excellence three times, producing thousands of centrifugal fire pumps for military bases around the world. Some of these pumps are still in service from WWII. Each year we are awarded hundreds of federal government contracts through numerous contracting vehicles.
