SHOWCASE PARTICIPANTS:

Event Overview

Darley, AWS & ResponderXLabs have come together with industry partners to showcase the future of public safety technology that's available for your agency today

Today, not tomorrow: The discussion around innovation for first responders is no longer a discussion about what could be here in the future. It's not a demonstration of what's available today.

Show me don't tell me: The event will be structured as an open house technology showcase where invited public safety leaders will have the opportunity to engage directly with 1 on 1 demos

Main Stage Presentations: Throughout the afternoon the main stage will host new feature releases and demonstrations of disruptive solutions

Event format designed specifically for first responder:

Come when you want, stay as long as you want, learn about new technology, network with industry leaders:

- 15 vetted cutting edge technologies driving innovation for first responders
- Invite only, exclusive for public safety
- Free to attend
- Un-sponsored - showcasing only the technology we've vetted and selected, not products that paid to be there

RESPONDER X LABS

Enabling Entrepreneurs. Empowering First Responders.

3AM Innovations

Designed a solution that utilizes state-of-the-art sensors, communication technologies, and software to solve indoor location for first responders

Whitefox

Comprehensive counter-drone solutions, providing situational awareness, forensic threat analysis, and aerial traffic management solutions.

openALPR

openALPR's platform provides solutions for Automatic License Plate Recognition helping public safety agencies increase their crime-fighting capabilities

Carbyne

Carbyne is a next generation emergency response platform encompassing advanced IP based communication features, global infrastructure and 911 caller solutions.

FlyMotion

An industry leader delivering turnkey turnkey Systems, innovative technology solutions, system integration and aerial flight services to Public Safety, Government, Defense and more.

Callyo

The world's #1 mobile phone technology for law enforcement to catch and prosecute child predators and human traffickers

Soma Global

SOMA provides Records Management, School Safety, Incident Management, and Mobile Dispatch features. SOMA delivers secure, mission-critical, real-time data to first responders.

Waycare

Shaping the future of city mobility by harnessing the power of in-vehicle and municipal traffic data.

Geospiza

Geospiza's web-based application, Swift™, saves lives by integrating data, applying machine learning techniques, and generating analytics to inform emergency preparedness and operations.

wi.fiber

Tomorrow's Smart-City, Today - wi-fiber's proprietary hardware supports smart-city integrations while simultaneously enabling a comprehensive, city-wide mesh network.

Venti, LLC

Venti provides real-time data collection sensors to provide first-on-the-scene responders with immediate actionable situational awareness, protecting personnel from potential hazards.

First Due

Pre-incident Planning and Emergency Response Re-imagined - First Due's solutions provides data on every structure, available from any device

Haas Alert

Introducing Responder-to-Vehicle (R2V™) technology to deliver real-time public safety notifications to motorists, informing them of the road ahead

Blueforce Development

Enables responders to rapidly form secure "swarms" of people, sensors, and AI services, to improve life safety for Responders.
