

Darley 2 1/2" Discharge Valve

2-1/2" discharge outlets shall be supplied with a Darley 2-1/2" valve and chrome NST threads shall be supplied at the panel. The valve body shall be fully constructed of bronze and be furnished with a high polished chrome plated brass ball.

Each valve shall be a quarter turn ball type, self locking, fixed pivot design and shall be operated with a lever control from the operator's panel.

If selected, each valve shall have a chrome 30 degree elbow, with a chrome cap and a stainless steel retaining chain. The valve control shall be mounted to the valve body mounted behind the pump panel.
