

Darley

Super Single Tire & Wheel Package

Add an Additional 6" of Ground Clearance to Your Tactical Pumper™

Features

Various front bumper and grill guards also available with receivers and/or portable winches to suit your specific needs.

A spacious hosebed and large rear compartment finish off the back of this pumper.

Quick Response and Full Access

Darley's new Tactical Pumper™ is engineered to get to the fire quickly and into places that a full size pumper just can't access. This unit features all-wheel drive and an overall height under 8' tall. Once on scene, Darley's easy-to-operate AutoCAFS® compressed air foam system packs a punch.

The Darley Super Single Tire & Wheel Package includes 335/80R20 Continental MPT81 tires on DOT rated wheels with bead locks and special gearing to get the most power to the ground through all speed ranges. A 2" suspension lift is also provided both front and rear. This lift, along with the taller 40" tires will gain you an additional 6" of ground clearance under your Darley Tactical Pumper™. Contact Darley for a full set of specifications or to schedule a demonstration.
