Body

- PolyBilt™ copolymer
- Integral 400 gallon water tank (25 gallon foam tank)
- 7 large compartments with roll-up doors
- Enclosed ladder and suction hose storage
- Rear compartment (Can be used for optional 150' booster reel)

Darley's new Tactical Pumper™ is engineered to safely get to the fire quickly and into places that a full size pumper just can't access. With four wheel drive and a height of approximately 8' tall, this vehicle can get you into those difficult to access driveways. Once on scene, Darley's easy-to-operate AutoCAFS® compressed air foam system packs a punch. Please contact Darley for a full set of specifications or to schedule a demonstration.

Features

- NFPA compliant
- Rear receiver hitch with trailer wiring and optional portable winch power leads
- Includes a 2½" Darley AutoFill™ - Once connected to a pressurized source of water, this direct fill feature keeps the water tank between ½ and "FULL" automatically
- Low cost of maintenance
- Ease of driver training - Drivers report having greater confidence when driving this vehicle over larger trucks
